

Tile Redi® Launches Designer Drain Plates

Article Number: 3542

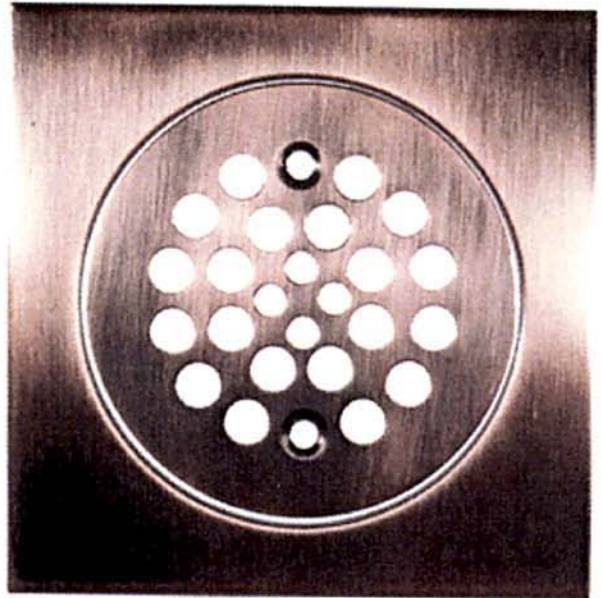

Tile Redi, manufacturer and marketer of pre-formed, one-piece shower pans, has launched an exclusive line of designer drain plates for a perfect fit when used in combination with the company's easy-to-install waterproof shower pans.

Since all Tile Redi shower pans allow ceramic, glass or stone tiles to be adhered directly to the surface, each drain is manufactured in a square form, rather than a circle, to make the drain easier to tile around. The designer drain plates are available in 18 variations of the standard base colors, including Black, Brass, Bronze, Chrome, Copper, Nickel and White, in order to match the existing hardware in the bathroom.

Tile Redi's unique line of products have set a new industry standard for labor- and time-reducing shower installations. For both the residential and commercial construction sectors, Tile Redi shower pans are mold-free and 100 percent leak-proof with no additional on-site shower pan waterproofing required at the time of the installation.

Tile Redi patented and UL-listed shower pans are manufactured as pre-formed, one-piece molded shower modules. Complete with fully integrated drains, curbs and splash walls, each leak-proof unit is pre-pitched for easy drainage. By solving water intrusion problems, Tile Redi shower pans inhibit the growth of mold and mildew.
