

Sinclair Equipment Company

Booth 7020

The Turbo II floor stripper continues to command the floor covering removal of most job site applications, including commercial carpet, vinyl, VCT, rubber, sport surfaces, ceramic tile, and glue down hardwood. The exclusive hand-operated clutch, transport wheels and removable handle & weight systems make the Turbo II easy to maneuver.

**Tile Redi**

Booth 4571

Tile Redi has launched an exclusive line of designer drain plates for a perfect fit when used in combination with the company's easy-to-install waterproof shower pans. Each drain plate is manufactured in a square form, rather than a circle, to make the drain easier to tile around. The designer drain plates are available in 18 variations of standard base colors.

**TAVY Enterprises, LLC**

Booth G-2109

TAVY Thin-Skin Underlayment is a two-part system that facilitates setting of tile or stone over any sound floor, countertop or wall. The lightweight (less than 12 lbs. per 100 square feet) Thin-Skin is simply trimmed to size and glued to the existing surface, using TAVY #007 Thin-Skin Glue. Skim-coat the top of the underlayment and the surface is ready for tile-setting. One roll of underlayment and one gallon of glue will cover 100 square feet without dust or waste since all underlayment pieces are usable regardless of size and shape. The underlayment provides crack suppression up to 1/4-inch over concrete.
