Tile Redi Goes West

August 22, 2009

Tile Redi products are now going to be available in numerous locations throughout the West, thanks to Standard Plumbing Supply, which will be carrying the company's shower products at its 50 locations in California, Oregon, Arizona, Nevada, Wyoming, Idaho, Colorado and Utah. Among the products to be available are Tile Redi's leak-proof shower pans with fully integrated drains, curbs and splash walls.

"Tile Redi shower pans are so easy to work with, homeowners can install them," said Dave Freeman, a VP at Standard Plumbing Supply. "We had a local plumber and tile contractor come in and work with the product and they both thought it was great. We envision most of our customers purchasing Tile Redi products to be plumbers, but we actually feel it might be an even bigger benefit for the tile setter. When the product is in place, the tile contractor can immediately start installing glass, ceramic, porcelain or stone tiles. It's a great product and a great company to partner with. Eventually we'll offer Tile Redi products at all of our locations."

Standard Plumbing Supply will also offer more than 60 different Tile Ready shower pan models online.
